Career Summary

I am a Flutter Developer with experience in building mobile applications for Android and iOS. I have worked on projects such as Barihat (Real Estate), Bechabo (Marketplace), and Bilipatra (E-commerce with 600K+ downloads). I have experience in developing clean and responsive user interfaces, integrating REST APIs, and implementing features like authentication, Google Maps, chat, and payment systems. I am familiar with MVC and MVVM architecture, as well as state management using GetX and Riverpod. I also have experience with Firebase, local databases, and Git. I enjoy learning new technologies and building simple, reliable, and user-friendly mobile applications.

Technical Skills

Coding skills: Dart, Java

UI Frameworks: Flutter, SwiftUI

App Architecture: MVC, MVVM, Clean Architecture

State Management: GetX, Riverpod

App Publishing: Google Play Console (App Publishing & Release Management)

Firebase Services: Firebase Authentication, Firebase Realtime Database, Firebase Cloud Messaging (FCM), Firebase Cloud Storage

Map Services: Google Maps API.

Databases / Local Storage: GetStorage, SharedPreferences, flutter_secure_storage, sqflite, Drift, Hive

Agile: Scrum Practices.

CI/CD Automation: GitHub Actions

IDE: Android Studio, Xcode, IntelliJ IDEA, Visual Studio Code

Version Control: Git, Github, Gitlab.

Debugging Tools: flutter_alice, Android Studio Debugger.

Experience

Pran-RFL Group

July 2, 2026 – Present

Sub Assistant Manager | Software Engineer – Mobile App Developer

Rajshahi, Bangladesh

- Developing and maintaining Flutter applications using Clean Architecture.
- Collaborating with cross-functional teams to deliver scalable, high-quality mobile applications.

D-Bug Station Limited

September 1, 2024 – June 30, 2026

Dhaka, Bangladesh

Junior Software Engineer – Mobile App Developer

January 1, 2025 – June 30, 2026

- Contributed to feature development for a marketplace app with **250k+ downloads**, ensuring timely delivery and high-quality implementation using Scrum methodologies.
- Collaborated with clients and stakeholders to gather requirements and translate them into actionable development plans.
- Designed and implemented intuitive posting, browsing, and messaging functionalities, enhancing user engagement and team productivity.
- Delivered complex features smoothly using Scrum practices.

Intern – Mobile App Developer

September 1, 2024 – December 31, 2024

- Assisted in developing Flutter applications and fixing bugs under senior developer guidance.
- Participated in testing, debugging, and implementing new application features.

Projects

- **Bilipatra Bazaar: Buy And Sell (Android & iOS)** | [Android Link](#) | [iOS Link](#)

Description: Local marketplace app with 250K+ downloads, connecting users to buy and sell products across categories such as vehicles, livestock, electronics, and services. Includes posting with photos/videos, in-app chat, and location-based search.

Technology: Flutter, Dart, GetX (State Management), GetStorage, REST API, Firebase, MVC, Flutter DevTools, Push Notifications, Google Maps Integration, Realtime SMS/Chat with Pusher,

- **Bechabo (Android)** | [Android Link](#)

Description: Modern Buy Sell platform in Bangladesh with AI-powered search, location filtering, posting with photos/videos, and in-app chat call features.

Technology: Flutter, Dart, GetX (State Management), GetStorage, REST API, Firebase, MVC, Flutter DevTools, Push Notifications, Google Maps Integration

- **SleepOasis AI: Sounds, Tracker (Android & iOS)** | [Android Link](#) | [iOS Link](#)

Description: Sleep tracking analysis app that monitors sleep patterns, records snoring or sleep talking, and provides insights and recommendations to improve sleep quality. Includes monthly and weekly sleep analysis, custom sleep sounds, AI coach guidance, and guided breathing exercises.

- **Expenses Pro: Budget Tracker (iOS)** | [iOS Link](#)

Description: A comprehensive expense management app designed to simplify personal finance by enabling users to track spending, manage budgets, and gain financial insights. Includes advanced features such as recurring transactions, multi-currency support, visual reports, receipt management, and secure cloud synchronization to enhance financial decision-making.

Technology: Swift, SwiftUI, iCloud,

- **Barihat – Real Estate App Solution (Android & iOS)** | [Link](#)

Description: Barihat Real Estate App Solution is a complete platform for property listings, discovery, and management, providing a seamless experience for users, agents, and admins through mobile and web applications.

Technology: Flutter, In-App Purchases With Revenue Cat, Dart, GetX (State Management), GetStorage, REST API, Firebase, sqflite, MVC, Flutter DevTools, Realtime SMS/Chat with Pusher,

- **Car Buy-Sell full classified (Android & iOS)** | [Link](#)

Description: Car BuySell is a full marketplace app for buying and selling cars. It helps users, sellers, and admins manage car listings, search easily, and connect through both mobile and web platforms.

Technology: Flutter, In-App Purchases With Revenue Cat, Dart, GetX (State Management), GetStorage, REST API, Firebase, sqflite, MVC, Flutter DevTools, Realtime SMS/Chat with Pusher,

Education

Bangladesh University of Business and Technology - BUBT

Bachelor of Science in Computer Science and Engineering (GPA: 3.63 / 4.00)

- Major in Artificial Intelligence

April 2021 - Jan 2025

Dhaka, Bangladesh
